1 2 21 NCAC 12A .0202 is amended with changes as published in 38:04 NCR 213-217 as follows:

2

21 NCAC 12A .0202 CLASSIFICATION

4 (a) A general contractor shall be certified in one of the following five classifications:

5 (1)Building Contractor. This classification covers all building construction and demolition activity 6 including: commercial, industrial, institutional, and all residential building construction. It includes 7 installation of solar panels; parking decks; all site work, grading and paving of parking lots, 8 driveways, sidewalks, and gutters; storm drainage, retaining or screen walls, and hardware and 9 accessory structures; and indoor and outdoor recreational facilities including natural and artificial 10 surface athletic fields, running tracks, bleachers, and seating. It also covers work done under the 11 specialty classifications of S(Concrete Construction), S(Insulation), S(Interior Construction), 12 S(Marine and Freshwater Construction), S(Masonry Construction), S(Roofing), S(Metal Erection), 13 S(Swimming Pools), and S(Asbestos), and S(Wind Turbine).

- 14 (2) Residential Contractor. This classification covers all construction and demolition activity pertaining 15 to the construction of residential units that are required to conform to the Residential Building Code 16 adopted by the Building Code Council pursuant to G.S. 143-138; all site work, driveways, 17 sidewalks, and water and wastewater systems ancillary to the aforementioned structures and 18 improvements; and the work done as part of such residential units under the specialty classifications 19 of S(Insulation), S(Interior Construction), S(Masonry Construction), S(Roofing), S(Swimming 20 Pools), and S(Asbestos). This classification also covers the installation of solar panels on residential 21 units that are required to conform to the residential building code.
- 22 (3)Highway Contractor. This classification covers all highway construction activity including: 23 demolition, grading, paving of all types, installation of exterior artificial athletic surfaces, relocation 24 of public and private utility lines ancillary to a principal project, bridge construction and repair, 25 culvert construction and repair, parking decks, sidewalks, curbs, gutters and storm drainage. It also 26 includes installation and erection of guard rails, fencing, signage, and ancillary highway hardware; 27 covers paving and grading of airport and airfield runways, taxiways, and aprons, including the 28 installation of fencing, signage, runway lighting and marking; and work done under the specialty 29 classifications of S(Boring and Tunneling), S(Concrete Construction), S(Marine and Freshwater 30 Construction), S(Railroad Construction), and H(Grading and Excavating).
- (4) Public Utilities Contractor. This classification includes demolition and operations that are the
 performance of construction work on water and wastewater systems and on the subclassifications
 of facilities set forth in G.S. 87-10(b)(3). The Board shall issue a license to a public utilities
 contractor that is limited to any of the subclassifications set forth in G.S. 87-10(b)(3) for which the
 contractor qualifies. A public utilities contractor license covers work done under the specialty
 classifications of S(Boring and Tunneling), PU(Communications), PU(Fuel Distribution),

1		PU(Ele	ectrical-Ahead of Point of Delivery), PU(Water Lines and Sewer Lines), PU(Water	
2		Purification and Sewage Disposal), and S(Swimming Pools).		
3	(5)	Specialty Contractor. This classification covers all construction operation and performance of		
4		contract work outlined as follows:		
5		(A)	H(Grading and Excavating). This classification covers the digging, moving, and placing of	
6			materials forming the surface of the earth, excluding air and water, in such a manner that	
7			the cut, fill, excavation, grade, trench, backfill, or any similar operation may be executed	
8			with the use of hand and power tools and machines used for these types of digging, moving,	
9			and material placing. It covers work on earthen dams and the use of explosives used in	
10			connection with all or any part of the activities described in this Subparagraph. It also	
11			includes clearing and grubbing, and erosion control activities.	
12		(B)	S(Boring and Tunneling). This classification covers the construction of underground or	
13			underwater passageways by digging or boring through and under the earth's surface,	
14			including the bracing and compacting of such passageways to make them safe for the	
15			purpose intended. It includes preparation of the ground surfaces at points of ingress and	
16			egress.	
17		(C)	PU (Communications). This classification covers the demolition and installation of the	
18			following:	
19			(i) all types of pole lines, and aerial and underground distribution cable for telephone	
20			systems;	
21			(ii) aerial and underground distribution cable for cable TV and master antenna TV	
22			systems capable of transmitting R.F. signals;	
23			(iii) underground conduit and communication cable, including fiber optic cable; and	
24			(iv) microwave systems and towers, including foundations and excavations where	
25			required, when the microwave systems are being used for the purpose of	
26			transmitting R.F. signals; and installation of PCS or cellular telephone towers and	
27			sites.	
28		(D)	S(Concrete Construction). This classification covers the construction, demolition, and	
29			installation of foundations, pre-cast silos, and other concrete tanks or receptacles,	
30			prestressed components, and gunite applications, but excludes bridges, streets, sidewalks,	
31			curbs, gutters, driveways, parking lots, and highways.	
32		(E)	PU(Electrical-Ahead of Point of Delivery). This classification covers the construction,	
33			installation, alteration, maintenance, or repair of an electrical wiring system, including sub-	
34			stations or components thereof, which is or is intended to be owned, operated, and	
35			maintained by an electric power supplier, such as a public or private utility, a utility	
36			cooperative, or any other properly franchised electric power supplier, for the purpose of	

1		furnishing electrical services to one or more customers. This classification includes the
2		construction of solar arrays.
3	(F)	PU(Fuel Distribution). This classification covers the construction, installation, alteration,
4	(1)	maintenance, or repair of systems for distribution of petroleum fuels, petroleum distillates,
5		natural gas, chemicals, and slurries through pipeline from one station to another. It includes
6		all excavating, trenching, and backfilling in connection therewith. It covers the installation,
7		replacement, and removal of above ground and below ground fuel storage tanks.
8	(G)	PU(Water Lines and Sewer Lines). This classification covers demolition and construction
9	(0)	work on water and sewer mains, water service lines, and house and building sewer lines,
10		as defined in the North Carolina State Building Code, and covers water storage tanks, lift
10		stations, pumping stations, and appurtenances to water storage tanks, lift stations, and
11		
12		pumping stations. It includes pavement patching, backfill, and erosion control as part of construction.
13	(H)	PU(Water Purification and Sewage Disposal). This classification covers the demolition and
14	(п)	
15		performance of construction work on water and wastewater systems; water and wastewater
		treatment facilities; and all site work, grading, and paving of parking lots, driveways,
17		sidewalks, curbs, and gutters that are ancillary to such construction of water and wastewater
18		treatment facilities. It covers the work done under the specialty classifications of
19		S(Concrete Construction), S(Insulation), S(Interior Construction), S(Masonry
20		Construction), S(Roofing), and S(Metal Erection) as part of the work on water and
21		wastewater treatment facilities.
22	(I)	S(Insulation). This classification covers the installation, alteration, or repair of materials
23		classified as insulating media used for the non-mechanical control of temperatures in the
24		construction of residential and commercial buildings. It does not include the insulation of
25		mechanical equipment, and lines and piping that are ancillary to the building.
26	(J)	S(Interior Construction). This classification covers the installation and demolition of
27		acoustical ceiling systems and panels, load bearing and non-load bearing partitions, lathing
28		and plastering, flooring and finishing, interior recreational surfaces, window and door
29		installation, and installation of fixtures, cabinets, and millwork. It includes the removal of
30		asbestos and replacement with non-toxic substances.
31	(K)	S(Marine and Freshwater Construction). This classification covers all marine and
32		freshwater demolition and construction and repair activities and all types of marine and
33		freshwater construction and demolition in deep-water installations and in harbors, inlets,
34		sounds, bays, channels, canals, rivers, lakes, ponds, or any navigable waterway; it covers
35		dredging, construction, and installation of pilings, piers, decks, slips, docks, and bulkheads.
36		It does not include other structures that may be constructed on docks, slips, and piers.

1	(L)	S(Mason	nry Construction). This classification covers the demolition and installation, with
2		or witho	ut the use of mortar or adhesives, of the following:
3		(i)	brick, concrete block, gypsum partition tile, pumice block, or other lightweight
4			and facsimile units and products common to the masonry industry;
5		(ii)	installation of fire clay products and refractory construction; and
6		(iii)	installation of rough cut and dressed stone, marble panels and slate units, and
7			installation of structural glazed tile or block, glass brick or block, and solar screen
8			tile or block.
9	(M)	S(Railro	ad Construction). This classification covers the demolition, building, construction,
10		and repa	ir of railroad lines including:
11		(i)	the clearing and filling of rights-of-way;
12		(ii)	shaping, compacting, setting, and stabilizing of road beds;
13		(iii)	setting ties, tie plates, rails, rail connectors, frogs, switch plates, switches, signal
14			markers, retaining walls, dikes, fences, and gates; and
15		(iv)	construction and repair of tool sheds and platforms.
16	(N)	S(Roofi	ng). This classification covers the installation, demolition, and repair of roofs and
17		decks or	residential, commercial, industrial, and institutional structures requiring materials
18		that form	n a water-tight and weather-resistant surface. The term "materials" for purposes of
19		this Sub	paragraph includes cedar, cement, asbestos, clay tile and composition shingles, all
20		types of	metal coverings, wood shakes, single ply and built-up roofing, protective and
21		reflectiv	e roof and deck coatings, sheet metal valleys, flashings, gravel stops, gutters and
22		downspo	outs, and bituminous waterproofingwaterproofing including torch down roof
23		systems.	. Any insulation material installed as a component of a torch down roofing system
24		<u>shall be</u>	included as work covered under this classification.
25	(0)	S(Metal	Erection). This classification covers:
26		(i)	the field fabrication, demolition, erection, repair, and alteration of architectural
27			and structural shapes, plates, tubing, pipe and bars, not limited to steel or
28			aluminum, that are or may be used as structural members for buildings,
29			equipment, and structure; and
30		(ii)	the layout, assembly and erection by welding, bolting, riveting, or fastening in any
31			manner metal products as curtain walls, tanks of all types, hoppers, structural
32			members for buildings, towers, stairs, conveyor frames, cranes and crane
33			runways, canopies, carports, guard rails, signs, steel scaffolding as a permanent
34			structure, rigging, flagpoles, fences, steel and aluminum siding, bleachers, fire
35			escapes, and seating for stadiums, arenas, and auditoriums.
36	(P)	S(Swim	ming Pools). This classification covers the construction, demolition, service, and
37		repair of	f all swimming pools. It includes:

2 (ii) construction of concrete, gunite, fiberglass, metal-walled with liner, steel-walled 3 with liner, and plastic-type pools, pool decks, and walkways, and tiling and 4 coping; and 5 (iii) installation of all equipment including pumps, filters, and chemical feeders. It 6 does not include direct connections to a sanitary sewer system or to portable water 7 lines, nor the grounding and bonding of any metal surfaces or the making of any 8 electrical connections. 9 (Q) S(Asbestos). This classification covers renovation or demolition activities involving the 10 repair, maintenance, removal, isolation, encapsulation, or enclosure of Regulated Asbestos 11 Containing Materials (RACM) for any commercial, industrial, or institutional building 12 whether public or private. It also covers all types of residential building construction 13 involving RACM during removation or demolition activities. This specially is required only 14 whether public or private. It also covers the construction, demolition, installation, and 15 thousand dollars (\$30,000). 16 (R) S(Wind Turbine). This classification ocvers the construction, demolition activites. It is locudes assembly of 18 blades, generator, turbine st	1			(i)	excavation and grading;	
3 with liner, and plastic-type pools, pool decks, and walkways, and tiling and 4 coping; and 5 (iii) 6 does not include direct connections to a sanitary sewer system or to portable water 7 lines, nor the grounding and bonding of any metal surfaces or the making of any 8 clectrical connections. 9 (Q) S(Asbestos). This classification covers renovation or demolition activities involving the 10 repair, maintenance, removal, isolation, encapsulation, or enclosure of Regulated Asbestos 11 Containing Materials (RACM) for any commercial, industrial, or institutional building 12 whether public or private. It also covers all types of residential building construction 13 involving RACM during renovation or demolition activities. This specialty is required only 14 whether public of asbestos activities as described herein are equal to or exceed thirty 15 thousand dollars (S30,000). 16 (R) S(Wind Turbine). This classification overs the construction, demolition, installation, and 17 repair of wind turbines, wind generators, and wind power units. It includes assembly of 18 blades, generator, turbin structures, and twores. It also includes ancillary foundation work. 19 field fabricati						
4 coping; and 5 (iii) installation of all equipment including pumps, filters, and chemical feeders. If 6 does not include direct connections to a sanitary sever system or to portable water 7 lines, nor the grounding and bonding of any metal surfaces or the making of any 8 celetrical connections. 9 (Q) S(Asbestos). This classification covers renovation or demolition activities involving the 10 repair, maintenance, removal, isolation, encapsulation, or enclosure of Regulated Asbestos 11 Containing Materials (RACM) for any commercial, industrial, or institutional building 12 whether public or private. It also covers all types of residential building construction 13 involving RACM during renovation or demolition activities. This specialty is required only 14 when the cost of asbestos activities as described herein are equal to or exceed thirty 15 thousand dollars (\$30,000). 16 (R) S(Wind Turbine). This classification overs the construction, demolition, installation, and 17 repair of wind turbines, wind generators, and wind power units. It includes assembly of 18 blades, generator, turbine structures, and towers. It also includes ancillary foundation work. 19 fiel				(11)		
5 (iii) installation of all equipment including pumps, filters, and chemical feeders. If 6 does not include direct connections to a sanitary sewer system or to portable water 7 lines, nor the grounding and bonding of any metal surfaces or the making of any 8 electrical connections. 9 (Q) S(Asbestos). This classification covers renovation or demolition activities involving the 10 repair, maintenance, removal, isolation, encapsulation, or enclosure of Regulated Asbestos 11 Containing Materials (RACM) for any commercial, industrial, or institutional building 12 whether public or private. It also covers all types of residential building construction 13 involving RACM during renovation or demolition activities. This specialty is required only 14 when the cost of asbestos activities as described herein are equal to or exceed thirty 15 thousand dollars (\$30,000). 16 (R) S(Wind Turbine). This classification covers the construction, demolition, installation, and 17 repair of wind turbines, wind generators, and wind power units. It includes assembly of 18 blades, generator, turbine structures, and lowers. It also includes ancillary foundation work. 19 field fabrication of metal equipment, and structural suppor components. 10						
6 does not include direct connections to a sanitary sewer system or to portable water 7 lines, nor the grounding and bonding of any metal surfaces or the making of any 8 electrical connections. 9 (Q) S(Asbestos). This classification covers renovation or demolition activities involving the 10 repair, maintenance, removal, isolation, encapsulation, or enclosure of Regulated Asbestos 11 Containing Materials (RACM) for any commercial, industrial, or institutional building, 12 whether public or private. It also covers all types of residential or exceed thirty 13 involving RACM during renovation or demolition activities. This specialty is required only 14 when the cost of asbestos activities as described herein are equal to or exceed thirty 15 thousand dollars (\$30,000). 16 (R) S(Wind Turbine). This classification covers the construction, demolition, installation, and 17 repair of wind turbines, wind generators, and wind power units. It includes assembly of 18 blades, generator, turbine structures, and towers. It also includes ancillary foundation work. 19 field fabrication of metal equipment, and structural support components. 20 (b) An applicant may be licensed in more than one classifications of all of the classification requested by <td< td=""><td></td><td></td><td></td><td>(;;;)</td><td></td></td<>				(;;;)		
7 lines, nor the grounding and bonding of any metal surfaces or the making of any electrical connections. 9 (Q) S(Asbestos). This classification covers renovation or demolition activities involving the repair, maintenance, removal, isolation, encapsulation, or enclosure of Regulated Asbestos Containing Materials (RACM) for any commercial, industrial, or institutional building, whether public or private. It also covers all types of residential building construction involving RACM during renovation or demolition activities. This specialty is required only when the cost of asbestos activities as described herein are equal to or exceed thirty thousand dollars (\$30,000). 16 (R) S(Wind Turbine). This classification covers the construction, demolition, installation, and repair of wind turbines, wind generators, and wind power units. It includes assembly of blades, generator, turbine structures, and towers. It also includes ancillary foundation work, field fabrication of metal equipment, and structural support components. 20 (b) An applicant may be licensed in more than one classification of general contracting provided the applicant meets the qualifications for the classifications, which includes passing the examinations for the classification requested by the applicant. The license granted to an applicant who meets the qualifications for the classification shall be designated "unclassified." 24 <i>History Note: Authority G.S.</i> 87-1; 87-4; 87-10; 25 <i>History Note: Authority G.S.</i> 87-1; 87-4; 87-10; 26 <i>Eff. February</i> 1, 1976; 27 <i>Readopted Eff. September</i> 26, 1977; <				(111)		
8 electrical connections. 9 (Q) S(Asbestos). This classification covers renovation or demolition activities involving the repair, maintenance, removal, isolation, encapsulation, or enclosure of Regulated Asbestos 11 Containing Materials (RACM) for any commercial, industrial, or institutional building, whether public or private. It also covers all types of residential building construction involving RACM during renovation or demolition activities. This specialty is required only when the cost of asbestos activities as described herein are equal to or exceed thirty thousand dollars (\$30,000). 16 (R) S(Wind Turbine). This classification covers the construction, demolition, installation, and repair of wind turbines, wind generators, and wind power units. It includes assembly of blades, generator, turbine structures, and towers. It also includes ancillary foundation work, field fabrication of met lan one classification of general contracting provided the applicant meets the qualifications for the classifications, which includes passing the examinations for the classification sequested by the applicant. The license granted to an applicant who meets the qualifications for all of the classifications set forth in the rules of this Section shall be designated "unclassified." 24 <i>History Note: Authority G.S.</i> 87-1; 87-4; 87-10; 25 <i>Eff.
