NORTH CAROLINA ADMINISTRATIVE CODE CLASSIFICATION SYSTEM

The North Carolina Administrative Code (NCAC) has four major classifications of rules. Three of these, titles, chapters, and sections are mandatory. The major classification of the NCAC is the title. Each major department in the North Carolina executive branch of government has been assigned a title number. Titles are further broken down into chapters which shall be numerical in order. Subchapters are optional classifications to be used by agencies when appropriate.

TITLE 21 – OCCUPATION LICENSING BOARDS

CHAPTER 46 – BOARD OF PHARMACY

Rule-making Agency: North Carolina Board of Pharmacy

Rule Citation: 21 NCAC 46.2507

Effective Date: May 11, 2004

Findings Reviewed and Approved by: Beecher R. Gray

Reason for Action: Immediate adoption is required to allow pharmacists to prebook influenza vaccinations in order to be prepared to meet the increased demand for influenza vaccinations in the coming fall and winter and to have sufficient quantities on hand to allow pharmacists to administer the vaccinations.

21 NCAC 46 .2507 ADMINISTRATION OF VACCINATIONS BY PHARMACISTS

A pharmacist who has successfully completed a course of training approved by the Board, and the North Carolina Medical Board, or the North Carolina Board of Nursing, may administer immunizations.

(a) Purpose. The purpose of this section is to provide standards for pharmacists engaged in the administration of vaccines as authorized in G.S. 90-85.3(r) of the North Carolina Pharmacy Practice Act.

(b) Definitions. The following words and terms, when used in this Section, shall have the following meanings, unless the context clearly indicates otherwise.

- (1) "ACPE" means American Council on Pharmaceutical Education.
- (2) "Administer" means the direct application of a drug to the body of a patient by injection, inhalation, ingestion, or other means by:
 - (A) a pharmacist, an authorized agent under his/her supervision, or other person authorized by law; or
 - (B) the patient at the direction of a practitioner.
- (3) "Antibody" means a protein in the blood that is produced in response to stimulation by a specific antigen. Antibodies help destroy the antigen that produced them. Antibodies against an antigen usually equate to immunity to that antigen.
- (4) "Antigen" means a substance recognized by the body as being foreign; it results in the production of specific antibodies directed against it.

- (5) "Board" means the North Carolina Board of Pharmacy.
- (6) "Confidential record" means any health-related record that contains information that identifies an individual and that is maintained by a pharmacy or pharmacist such as a patient medication record, prescription drug order, or medication order.
- (7) "Immunization" means the act of inducing antibody formation, thus leading to immunity.
- (8) "Medical Practice Act" means the North Carolina Medical Practice Act.
- (9) "Physician" means a currently licensed M.D. or D.O. in good standing with the North Carolina Medical Board who is responsible for the on-going, continuous supervision of the pharmacist pursuant to written protocols between the pharmacist and the physician.
- (10) "Vaccination" means the act of administering any antigen in order to induce immunity; is not synonymous with immunization since vaccination does not imply success.
- (11) "Vaccine" means a specially prepared antigen, which upon administration to a person will result in immunity.
- (12) Written Protocol--A physician's order, standing medical order, or other order or protocol. A written protocol must be prepared, signed and dated by the physician and pharmacist and contain the following:
 - (A) the name of the individual physician authorized to prescribe drugs and responsible for authorizing the written protocol;
 - (B) the name of the individual pharmacist authorized to administer vaccines;
 - (C) the immunizations or vaccinations that may be administered by the pharmacist:
 - (D) procedures to follow, including any drugs required by the pharmacist for treatment of the patient, in the event of an emergency or severe adverse reaction following vaccine administration;
 - (E) the reporting requirements by the pharmacist to the physician issuing the written protocol, including content and time frame;
 - (F) locations at which the pharmacist may administer immunizations or vaccinations; and

- (G) the requirement for annual review of the protocols by the physician and pharmacist.
- (c) Policies and Procedures
 - (1) Pharmacists must follow a written protocol as specified in Subparagraph (b)(12) of this Rule for administration of vaccines and the treatment of severe adverse events following administration.
 - (2) The pharmacist administering vaccines must maintain written policies and procedures for handling and disposal of used or contaminated equipment and supplies.
 - (3) The pharmacist or pharmacist's agent must give the appropriate vaccine information to the patient or legal representative with each dose of vaccine. The pharmacist must ensure that the patient or legal representative is available and has read, or has had read to them, the information provided and has had their questions answered prior to administering the vaccine.
 - (4) The pharmacist must report adverse events to the primary care provider as identified by the patient.
 - (5) The pharmacist shall not administer vaccines to patients under 18 years of age.

(d) Pharmacist requirements. Pharmacists who enter into a written protocol with a physician to administer vaccines shall:

- (1) hold a current provider level cardiopulmonary resuscitation (CPR) certification issued by the American Heart Association or the American Red Cross or equivalent;
- (2) successfully complete a certificate program in the administration of vaccines accredited by the Centers for Disease Control, the ACPE or a similar health authority or professional body approved by the Board:

(3) maintain documentation of:

(B) three hours of continuing education every two years beginning January 1, 2006, which are designed to maintain competency in the disease states, drugs, and administration of vaccines;

- (C) current certification specified in Subparagraph (1) of this Paragraph;
- (D) original written physician protocol;
- (E) annual review and revision of original written protocol with physician;
- (F) any problems or complications reported; and
- (G) items specified in Paragraph (g) of this Rule.

(e) Supervising Physician responsibilities. Physicians who enter into a written protocol with a pharmacist to administer vaccines shall:

- (1) be responsible for the formulation or approval and periodic review of the written protocols:
- (2) be easily accessible to the pharmacist administering the vaccines or be available through direct telecommunication for consultation, assistance, direction, and provide adequate back-up coverage; and
- (3) review written protocol with pharmacist at least annually and revise if necessary.

(f) Supervision. Pharmacists involved in the administration of immunizations or vaccinations shall be under the supervision of a physician. Physician supervision shall be considered adequate if the delegating physician:

- (3) receives, as appropriate, a periodic status report on the patient, including any problem or complication encountered; and
- (4) is available through direct telecommunication for consultation, assistance, and direction.

(g) Drugs. The following requirements pertain to drugs administered by a pharmacist:

- (1) Drugs administered by a pharmacist under the provisions of this section shall be in the legal possession of:
 - (A) a pharmacy, which shall be the pharmacy responsible for drug accountability, including the maintenance of records of administration of the immunization or vaccination; or

- (i) Confidentiality.
 - (1) The pharmacist shall comply with the privacy provisions of the federal Health Insurance Portability and Accountability Act of 1996 and any rules adopted pursuant to this act.
 - (2) Any other confidentiality provisions of federal or state laws.
