Commission for MH/DD/SAS	10A NCAC 28F .0209	Coordination and Continuity of Client Care	Other Statement	It is unclear if this Rule includes the discharge of a client from a hospital and referral to an unlicensed vs a licensed program for ongoing coordinated (with the family, medical and community providers) for mental health services. An unlicensed program providing mental health intensive therapy services should not be allowed under any law or Rule to participate in the treatment of those prescribed for intensive therapy upon discharge from a hospital. This, however, is happening in North Carolina.	The rule addresses the process for discharge planning, but is silent on the types of settings to which patients are referred. Discharge placements are based on an individual's needs and availability of resources and are not determined by license status of a provider/placement. For example, nearly half of individuals discharged from SPHs return to a home setting with family or friends – which are, of course, not licensed.
