Explain: We have received an industry request to make an exception to 2018 NIST Handbook 130 regarding the sale of potatoes. The current regulation allows for potatoes to be sold either by weight or dry measure. The current proposal would allow loose, unwrapped potatoes to also be sold individually, or by count, to stay consistent with Handbook 130 language. To ensure quality, industry would prefer to have only "US Grade No. 1" potatoes available by count. Language has been included for shipping containers and invoicing documents to assist retailers in being assured of the grade of potato they received and can offer it for sale accordingly.

9B. Explain: Rule .0715 is being repealed and the text relocated to new Rule .0503, including updated citations for the referenced standards. Moving the rule language from the .0700 Section to the Rule .0503 "Other Design Standards" makes it clearer that the national standards apply throughout Subchapter 18C. Design engineers always could propose the use of alternate standards under Rule .0502, but this change makes that availability clearer to the regulated community.
