| 1 | 15A NCAC 02B .0621 is amended pursuant to G.S. 150B-21.5(a)(3) as follows: |
|----|---|
| 2 | |
| 3 | 15A NCAC 02B .0621 WATER SUPPLY WATERSHED PROTECTION PROGRAM: DEFINITIONS |
| 4 | In addition to the definitions set forth in G.S. 143-214.7, the following definitions shall apply to Rules .06220624. |
| 5 | (1) "Balance of Watershed" or "-BW" means the area adjoining and upstream of the critical area in a |
| 6 | WS-II and WS-III water supply watershed. The "balance of watershed" is comprised of the entire |
| 7 | land area contributing surface drainage to the stream, river, or reservoir where a water supply intake |
| 8 | is located. |
| 9 | (2) "Built upon area" has the same meaning as in GS 143-214.7] |
| 10 | (2) [(3)] "Cluster development" has the same meaning as in 15A NCAC 02B .0202. means the grouping of |
| 11 | buildings in order to conserve land resources and provide for innovation in the design of the project |
| 12 | including minimizing stormwater runoff impacts. This term includes nonresidential development |
| 13 | as well as single family residential and multi family developments. Planned unit development and |
| 14 | mixed use development shall be considered as cluster development. |
| 15 | (3) [(4)] "Commission" has the same meaning as in 15A NCAC 02H .1002. |
| 16 | (4) [(5)] "Common plan of development" has the same meaning as in 15A NCAC 02H .1002. |
| 17 | (5) [(6)] "Critical area" has the same meaning as in 15A NCAC 02B .0202. |
| 18 | (6) [(7)] "Curb Outlet System" has the same meaning as in 15A NCAC 02H .1002. |
| 19 | (7) [(8)] "Dispersed flow" has the same meaning as in 15A NCAC 02H .1002. |
| 20 | (8) [(9)] "Division" has the same meaning as in 15A NCAC 02H .1002. |
| 21 | (9) [(10)] "Erosion and Sedimentation Control Plan" has the same meaning as in 15A NCAC 02H .1002. |
| 22 | (10) [(11)] "Existing development" has the same meaning as in 15A NCAC 02H .1002. |
| 23 | (11) [(12)] "Family subdivision" has the same meaning as in 15A NCAC 02B .0202. means a division |
| 24 | of a tract of land: |
| 25 | (a) to convey the resulting parcels, with the exception of parcels retained by the grantor, to a relative |
| 26 | or relatives as a gift for nominal consideration, but only if no more than one parcel is conveyed by |
| 27 | the grantor from the tract to any one relative; or |
| 28 | (b) to divide land form a common ancestor among tenants in common, all of whom inherited by |
| 29 | intestacy or by will. |
| 30 | (12) [(13)] "Geotextile fabric" has the same meaning as in 15A NCAC 02H .1002. |
| 31 | (13) [(14)] "Intermittent stream" has the same meaning as in 15A NCAC 02B .0610 means a well- |
| 32 | defined channel that contains water for only part of the year, typically during winter and spring |
| 33 | when the aquatic bed is below the perched or seasonal high water table. The flow may be [heavily] |
| 34 | supplemented by stormwater runoff. An intermittent stream often lacks the biological and |
| 35 | hydrological characteristics commonly associated with the continuous conveyance of water. |
| 36 | (14) [(15)] "Major variance" has the same meaning as in 15A NCAC 02B .0202. means a variance |
| 37 | that is not a "minor variance" as that term is defined in this Rule. |

1 of 3

| 1 | (15) [(16)] "Minimum Design Criteria" or "MDC" has the same meaning as in 15A NCAC | 02H .1002. |
|--|---|-------------------------|
| 2 | (16) [(17)] "Minor variance" has the same meaning as in 15A NCAC 02B .0202. means | a variance |
| 3 | from the minimum statewide watershed protection rules that results in the relaxation of | of up to 10 |
| 4 | percent of any vegetated setback, density, or minimum lot size requirement applicable to l | ow density |
| 5 | development, or the relaxation of up to five percent of any vegetated setback, density, or | r minimum |
| 6 | lot size requirement applicable to high density development. For variances to a vegetat | ted setback |
| 7 | requirement, the percent variation shall be calculated using the foot print of built-upon are | a proposed |
| 8 | to encroach within the vegetated setback divided by the total area of vegetated setback | within the |
| 9 | project. | |
| 10 | (17) [(18)] "Nonconforming lot of record" has the same meaning as in 15A NCAC 02B .02 | 202. <u>means</u> |
| 11 | a lot described by a plat or a deed that was recorded prior to the effective date of local | watershed |
| 12 | [regulations] ordinance (or [their] its amendments) that does not meet the minimum lot si | ize or other |
| 13 | development requirements of Rule .0624 of this Section. | |
| 14 | (18) [(19)] "NPDES" has the same meaning as in 15A NCAC 02H .1002. | |
| 15 | (19) [(20)] "Perennial stream" has the same meaning as in 15A NCAC 02B .0610 mea | ns a well- |
| 16 | defined channel that contains water year round during a year of normal rainfall with the a | aquatic bed |
| 17 | located below the perched or seasonal high water table for most of the year. Groundw | vater is the |
| 18 | primary source of water for a perennial steam, but it also carries stormwater runoff. A | A perennial |
| 19 | | 1 |
