## DO NOT EDIT ANYTHING ON THIS SHEET

1. Copy the header row and the first 2 rows below the header and then paste it into a new tab for each rule that gets a comment from the public.
2. Update the Rule and Name for each tab created.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
<b>Copy all columns in this row to the right of this yellow cell and paste in new rows</b>			Select One		
<b>Commission for Public Health</b>	15A NCAC 18A .2518	CIRCULATION SYSTEM	Public Comment as defined in G.S. 150B-21.3A(a)(5)	A specific condition should be made for pool and spa pumps to be properly grounded. Non-compliance should be a 6 point violation and an immediate suspension on the grade sheet.	Electrical grounding is under the electrical code. It is not under the jurisdiction of the public swimming pool rules. Environmental Health Specialists are not trained to determine if electrical pool components are properly grounded.
<b>Commission for Public Health</b>	15A NCAC 18A .2801	DEFINITIONS	Other Statement	Define mildly ill children	"Mildly sick children" is defined as the care of children with short-term illness, or symptoms of illness, or short-term disability, who are not able to attend their regular school or child care arrangement due to inability to participate in regular activities and requirements set forth in 10A NCAC 09 .0804. This type of child care program is licensed, regulated and defined by the Division of Child Development and Early Education not by the 2800 child care sanitation rules. There are additional regulations that apply to child care centers offering short term care to children who are mildly ill. These regulations can be found in Appendix B – Child Care Rules - Section .2400 – Child Care for Mildly Ill Children.
<b>Commission for Public Health</b>	15A NCAC 18A .2801	DEFINITIONS	Other Statement	Define food prep hand washing sink	A designated sink for hand washing provided in food preparation areas. It is defined as a "lavatory" under 15A NCAC 18A .2801(15) that is equipped with hot and cold water under pressure for the primary purpose of handwashing. This sink must be easily accessible, not likely to be obstructed and located within the working area.
<b>Commission for Public Health</b>	15A NCAC 18A .2801	DEFINITIONS	Other Statement	Define inspection area vs. licensed area. Explain accessible means everywhere (accessible is not limited to your licensed area).	The licensed area of a child care center is defined by the Division of Child Development and Early Education(DCDEE) in the NC Department of Health and Human Services which is the licensing agency of child care centers. The term "accessible" is defined as any area of a child care center that is possible to approach, capable of being reached, entered or used without restrictions. These areas are subject to inspection and not limited to your licensed area as defined by DCDEE.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2801	DEFINITIONS	Other Statement	Define hand washing sink change of use.	15 NCAC 18A .2818(b) requires that lavatories shall be cleaned and disinfected with each change of use. Change of use is defined as using a hand wash lavatory for any other purpose beyond its original intent. An example of a change of use would be using a hand wash lavatory to wash out paint brushes. While comment has validity and definition would add clarity, it is not of substantive public interest.
Commission for Public Health	15A NCAC 18A .2801	DEFINITIONS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Revise household bleach definition. There are new concentrations available & sold in retail stores.	The current disinfecting solution for bleach was formulated using a 5% sodium chlorite solution. Guidance has been given to child care centers in reference to the higher concentration of bleach available in retail stores. Furthermore, these solutions are required to be prepared and tested daily with a required 50-200 ppm of chlorine for sanitizers and 500-800 ppm of chlorine for disinfectants. In addition, .2812(g) requires a testing method or equipment, used in accordance with the product manufacturer's instructions, shall be made available, convenient, and regularly used to test the strengths of these chemical sanitizing solutions to ensure the prescribed concentrations are met.
Commission for Public Health	15A NCAC 18A .2801	DEFINITIONS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Define feeding to include what we consider 'complete' in terms of when a bottle should be discarded or re-served.	Current child care sanitation rules prohibit the re-serving of used bottles. There is not an allowable timeframe in which a bottle can be reserved once feeding is completed. 15A NCAC 18A .2804(d) requires that after the completion of each feeding, leftover formula, breast milk, and other bottled beverage be discarded or returned to the child's home at the end of each day. The completion of the feeding is determined by the child care operator not by the local Environmental Health Specialist. Examples of completion are when children are put down for napping after eating or when children are allowed to rejoin other children for normal class activities.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2801	DEFINITIONS	Public Comment as defined in G.S. 150B-21.3A(a)(5)	Remove recipe from disinfecting and sanitizing solution definitions.	<p>The current disinfecting solution for bleach was formulated using a 5% sodium chlorite solution. Guidance has been given to child care centers in reference to the higher concentration of bleach available in retail stores. Furthermore, these solutions are required to be prepared and tested daily with a required 50-200 ppm of chlorine for sanitizers and 500-800 ppm of chlorine for disinfectants. In addition, .2812(g) requires a testing method or equipment, used in accordance with the product manufacturer's instructions, shall be made available, convenient, and regularly used to test the strengths of these chemical sanitizing solutions to ensure the prescribed concentrations are met.</p> <p>Cannot remove recipe as it is required for 5% solution and .2812 still requires to test bleach solution daily.</p>
Commission for Public Health	15A NCAC 18A .2804	FOOD SUPPLIES	Other Statement	<p>Comment: Section D â?" please divide the following into their own sections to read more clearly:</p> <p>Breast milk Baby food Formula</p>	<p>For breast milk, baby food and formula the same provisions and requirements apply. 15A NCAC 18A .2804(d) requires that breast milk, baby food and formula are all fully prepared, dated and identified for the appropriate child at the child's home. In addition, all of these items are required to be returned at the child's home or discarded at the end of the day. If refrigeration is required, they are all required to be stored at 45 degrees or below. Unused portions of these products are to be returned home or discarded at the end of the day.</p> <p>Requirement for all 3 items are the same so dividing into sections would not add any benefit or additional clarity.</p>
Commission for Public Health	15A NCAC 18A .2804	FOOD SUPPLIES	Public Comment as defined in G.S. 150B-21.3A(a)(5)	Clarify if water is exempt from 'completion of feeding' rule and may be re-served throughout the day. Centers have reported reduced water consumption by children when the children have to request water versus having water readily available in their cubby.	<p>Pitchers of water can be reserved throughout the day. However, drinking vessels including sippy cups are required to be washed, rinsed and sanitized after each use. 15A NCAC 18A .2810 (f)(2) requires that after each use, all multi-service articles provided by the center shall be cleaned and sanitized in the child care kitchen. Moreover, 15A NCAC 18A .2812(e) states that multi-service articles shall be washed, rinsed and sanitized after each use. Centers that do not wish to meet these requirements usually provide disposable cups or have parents send additional sippy cups for use. This option would not reduce the readily availability of water.</p>

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2804	FOOD SUPPLIES	Other Statement	Section B (milk products) â" relocate to definitions.	Comment does not change substance of the rule. It simply suggests moving location of rule to definitions since the rule defines what constitutes a milk product.
Commission for Public Health	15A NCAC 18A .2804	FOOD SUPPLIES	Other Statement	Move all bottle warming equipment (& other drinking utensils) statements to .2809.	Comment does not change substance of the rule but suggests moving location of rule to section .2809. However, .2809 refers to material and construction of food service equipment. Bottle warming equipment and drinking utensils are referenced throughout the rules as it relates to storage, accessibility, cleaning and sanitizing.
Commission for Public Health	15A NCAC 18A .2804	FOOD SUPPLIES	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Move bottle warming equipment cleaning procedure to .2812 and specify if they can be washed, rinsed, and sanitized in place or must be sent to kitchen.	Bottle warming equipment is already currently required to be cleaned and sanitized as in .2812. .2810(f) requires that the food preparation counters, bottle warming equipment if used, food and food contact surfaces shall be out of reach of children and the following shall apply: (1) all equipment shall be cleaned at least daily. Warming equipment shall be cleaned and sanitized as required in Rule .2812 of this Section. Bottle warming equipment should be cleaned according to manufacturer instructions.
Commission for Public Health	15A NCAC 18A .2806	FOOD STORAGE AND PROTECTION	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Consider modifying hot holding temperature to match food code.	No current statutory authority to enforce NC Food Code in Child Care Centers.
Commission for Public Health	15A NCAC 18A .2806	FOOD STORAGE AND PROTECTION	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Guidance from the state indicated that a refrigerator in a storage room requires a full food preparation area, but a freezer does not. This needs to be clarified & put in writing.	NCAC 18A .2806(b)states that food items, that are stored in classrooms or other rooms intended for child care use, shall be limited to those food items which are individually packaged unless the classroom is equipped with a food preparation area. If refrigeration contains bulk food storage outside of the kitchen area, then a food preparation area is required. A food preparation area shall include a hand wash lavatory, adequate countertop space and when needed adequate refrigeration.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2806	FOOD STORAGE AND PROTECTION	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Guidance from state has indicated that storing milk in bulk containers in a 'dorm-style' refrigerator is unacceptable. Yet, if the classroom is equipped with a food preparation area, the rules say this is acceptable. If they do not want milk included in bulk storage, or want to specify what kind of refrigerator is required, this needs to be added to the rules.	Due to repeated issues related to dorm style refrigerators such as not holding proper temperature for bulk milk storage, inadequate space and improper aeration and air flow for high volume storage, it is the State's recommendation that bulk milk not be stored in dorm style refrigerators but in the child care's kitchen. However, this is not a violation if during the sanitation inspection the milk is being stored and maintained 45 degrees or below. A milk temperature must be measured and recorded above 45 degrees to be a demerited violation.
Commission for Public Health	15A NCAC 18A .2807	FOOD PREPARATION	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Modify pork final cook temperature to match food code.	No current statutory authority to enforce NC Food Code in child care centers.
Commission for Public Health	15A NCAC 18A .2807	FOOD PREPARATION	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Modify 'food in intact packages initial reheat' temperature to match food code.	No current statutory authority to enforce NC Food Code in child care centers.
Commission for Public Health	15A NCAC 18A .2808	FOOD SERVICE	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Modify section E hot hold temperature to match food code.	No current statutory authority to enforce NC Food Code in child care centers.
Commission for Public Health	15A NCAC 18A .2808	FOOD SERVICE	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Remove this sentence: 'Employees shall either use antibacterial soap, dips, or hand sanitizers immediately prior to food preparation or service.' This is not necessary because the first sentence of this section specifically says employees preparing or serving food shall wash their hands. Add the words 'immediately prior to' to the first sentence & remove second sentence completely.	Comment does not change substance of the rule but suggests rewording for clarity.
Commission for Public Health	15A NCAC 18A .2808	FOOD SERVICE	Public Coment as defined in G.S. 150B-21.3A(a)(5)	There should not be any reference to food preparation in the food service rule.	In rule .2808 the terms food preparation and food service are coupled as it relates to handwashing requirements for general food handling whether food service or food preparation. In addition, it notes that hair restraint is required when food is being prepared prior to food service.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2809	FOOD SERVICE EQUIPMENT AND UTENSILS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Define what is included in bottle warming equipment (i.e. different types).	Bottle warming equipment includes equipment manufactured for warming baby bottles & formula. Sanitation rules do not list different types of bottle warming equipment available on the market. But, rule .2809 specifically indicates approved material & construction of equipment & utensils which include the following: (1) Materials used in the construction of utensils & equipment shall be durable; corrosion-resistant; nonabsorbent; non-toxic; finished to have a smooth, easily cleanable surface; & resistant to pitting, chipping, cracking, scratching, distortion, & decomposition. (2) Food-contact surfaces shall be smooth; free of breaks, open seams, cracks, chips, pits & other imperfections; free of sharp internal angles, corners & crevices; & accessible for cleaning & inspection without being disassembled or by easy disassembly. (3) Nonfood contact surfaces shall be nonabsorbent with no obstructions to cleaning. (4) Solder shall be comprised of approved, non-toxic; corrosion-resistant materials. Galvanized metal shall not be used for utensils or food-contact equipment. Equipment & utensils that impart odors, color or taste, or contribute to the contamination of food shall not be used. Bottle warming equipment if used, shall be out of reach of children & the following shall be cleaned at least daily. Warming equipment shall be cleaned & sanitized as required in Rule .2812 this Section. For mechanical cleaning & sanitizing, food-contact surfaces of equipment & utensils shall be sanitized according to the manufacturer's instructions.
Commission for Public Health	15A NCAC 18A .2809	FOOD SERVICE EQUIPMENT AND UTENSILS	Other Statement	Move all bottle warming equipment (& other drinking utensils) statements to this section.	Comment does not change substance of the rule but suggests moving location of rule to section .2809. However, .2809 refers to material and construction of food service equipment. Bottle warming equipment and drinking utensils are referenced throughout the rules as it relates to storage, accessibility, cleaning and sanitizing.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2810	SPECIFICATIONS FOR KITCHENS, FOOD PREPARATION AREAS AND FOOD SERVICE AREAS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Separate food preparation areas and kitchens specifications into different rules/citations. Expand on food preparation area to clearly state lavatory requirement. What can and cannot be done in the hand washing sink at the food prep area?	(b) A separate lavatory for handwashing is required in food preparation areas. If the dishwashing area is separate from the food preparation area, an additional lavatory shall be required. (f) If food is prepared in a classroom, a food preparation area shall be provided. Water from a hand wash lavatory shall not be used to prepare formula, mix dry cereals, or other foods. Toy cleaning and sanitizing may also be conducted in this food preparation area. This food preparation area shall contain an easily cleanable countertop and a lavatory and, when needed, adequate refrigeration.
Commission for Public Health	15A NCAC 18A .2810	SPECIFICATIONS FOR KITCHENS, FOOD PREPARATION AREAS AND FOOD SERVICE AREAS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Guidance from the state has indicated there should be a certain distance between the hand washing sink & the refrigerator in the food prep area. Clearly define a distance requirement if this is the case.	There is no measurable distance requirement between the hand wash sink and refrigerator in a food preparation area. .2810(f) states that if food is prepared in a classroom, a food preparation area shall be provided..... This food preparation area shall contain an easily cleanable countertop and a lavatory and, when needed, adequate refrigeration. The food preparation area should be defined and limited to those items specifically related to food storage and food preparation. The hand wash sink must be easily accessible, not likely to be obstructed and located within the defined working area.
Commission for Public Health	15A NCAC 18A .2812	CLEANING AND SANITIZING EQUIPMENT AND UTENSILS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	In reference to .2810(f)(2), restate in this section that these items must go to the kitchen to be washed, rinsed, and sanitized.  This section should include WHERE bottle warming equipment can be washed, rinsed, and sanitized. Can it be cleaned in place or does it have to be sent to kitchen?	Bottle warming equipment is already currently required to be cleaned and sanitized as in .2812. .2810(f) requires that the food preparation counters, bottle warming equipment if used, food and food contact surfaces shall be out of reach of children and the following shall apply: (1) all equipment shall be cleaned at least daily. Warming equipment shall be cleaned and sanitized as required in Rule .2812 of this Section. Bottle warming equipment should be cleaned according to manufacturer instructions.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2815	WATER SUPPLY	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Modify hot water used for cleaning & sanitizing temperature requirement to match food code (110F). This would significantly reduce hot water violations and provisional statuses.	

There is no current statutory authority to enforce NC Food Code in child care centers.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2818	LAVORATORIES	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Discuss in this section the 'types' of hand washing sinks and their limitations & uses. It is extremely difficult to assess the amount of lavatories needed/required in a classroom & explain to an operator their deficiencies without these specifications clearly stated in one location.	<p>The number of lavatories required in a child care center is primarily determined by the NC Building Code based on the number of toilets and number of children. However, in reference to child care sanitation, additional lavatories are required based off the following:</p> <p>.2810(b) A separate lavatory for handwashing is required in food preparation areas. If the dishwashing area is separate from the food preparation area, an additional lavatory shall be required.</p> <p>.2810(f) If food is prepared in a classroom, a food preparation area shall be provided..... This food preparation area shall contain an easily cleanable countertop and a lavatory and, when needed, adequate refrigeration.</p> <p>.2819(a) (a) In child care centers, children in diapers shall be changed at stations designated for diapering or toileting. Each diaper changing station shall include a hand wash lavatory. For centers licensed for fewer than 13 children and located in a residence and for diaper changing areas designated for school age children, a hand wash lavatory shall be in or next to a diaper changing area.</p>
Commission for Public Health	15A NCAC 18A .2819	DIAPERING AND DIAPER CHANGING FACILITIES	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Clarify the required proximity for a hand washing sink in a diaper changing 'area'	<p>2819(a) In child care centers, children in diapers shall be changed at stations designated for diapering or toileting. Each diaper changing station shall include a hand wash lavatory. For centers licensed for fewer than 13 children and located in a residence and for diaper changing areas designated for school age children, a hand wash lavatory shall be in or next to a diaper changing area.</p>

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2820	STORAGE	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Comment: Specify in the rules that 'locked storage room' does NOT include kitchen.	Correct. .2820(b) states that all corrosive agents, pesticides, bleaches, detergents, cleansers, polishes, any product which is under pressure in an aerosol dispenser, and any substance which may be hazardous to a child if ingested, inhaled, or handled shall be kept in its original container or in another labeled container, used according to the manufacturer's instructions and stored in a locked storage room or cabinet when not in use. The kitchen has been deemed not to be a locked storage room or cabinet. Therefore, locking the kitchen door does not meet the requirement of the rule. In addition, .2808(f) states that children attending child care centers shall not be in the kitchen except when participating in a supervised activity. Chemicals should not be assessible to children during these supervised activities.
Commission for Public Health	15A NCAC 18A .2820	STORAGE	Public Coment as defined in G.S. 150B-21.3A(a)(5)	(f) Specify that if employee hand bags contain hazardous products they must be locked up	Correct.2820(b) All corrosive agents, pesticides, bleaches, detergents, cleansers, polishes, any product which is under pressure in an aerosol dispenser, and any substance which may be hazardous to a child if ingested, inhaled, or handled shall be kept in its original container or in another labeled container, used according to the manufacturer's instructions and stored in a locked storage room or cabinet when not in use. Locked storage rooms and cabinets shall include those which are unlocked with a combination, electronic or magnetic device, key, or equivalent locking device. These unlocking devices shall be kept out of the reach of a child and shall not be stored in the lock. Toxic substances shall be stored below or separate from medications and food. Any product not listed above, which is labeled "keep out of reach of children" without any other warnings, shall be kept inaccessible to children when not in use, but is not required to be kept in locked storage. The product shall be considered inaccessible to children when stored on a shelf or in an unlocked cabinet that is mounted a minimum vertical distance of five feet above the finished floor.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .2820	STORAGE	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Guidance from state has indicated that belongings in adjacent, individual cubbies shall not touch. If this is the case, this needs to be clearly stated in the rules.	.2820(e) Individual cubicles, lockers, or coat hooks shall be provided for storage of coats, hats, or similar items. Coat hooks not in individual cubicles or lockers, shall be spaced at least 12 horizontal inches apart. Combs shall be labeled and stored individually. The fact that items are to be stored individually in lockers or cubicles or spaced at least 12 inches apart implies that separation of individual items is expected to be met by this rule. If items are allowed to comingle then individual storage of items have not been achieved per requirement of the rule.
Commission for Public Health	15A NCAC 18A .2834	COMPLIANCE, INSPECTIONS AND REPORTS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	<p>Please specify under each item number which sections of the rule apply.</p> <p>Complete thorough marking instructions would be extremely helpful for this rule set.</p>	<p>program that has been designated as a child care center by the Division of Child Development. Demerits shall be assigned for each occurrence of violations within these requirements.....</p> <p>.2834 breaks down the violation and the demerit assignment of the violations for the 2800 Child Care Sanitation rules according to the rules and the inspection sheet.</p> <p>Comment applies to inspection form completion and not directly to the rule</p>
Commission for Public Health	15A NCAC 18A .3101	DEFINITIONS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	#(1) definition of 'inspection' - allows for soil and dust sampling as part of an inspection, this is in direct conflict with the regulated activities found under existing NCAC, EPA & HUD regulations. EPA, HUD and 10A NCAC 41C (by reference) regulates and defines these activities where soils and dust sampling are to be conducted as part of a risk assessment by a certified Risk Assessor. As written, this re-defines the term 'inspection' and allows activities otherwise not allowed by federal and NC state law.	The adoption of the definition of “inspection” in 15A NCAC 18A .3101 preceded by 15 years the definition adopted in 10A NCAC 41C. We recognize that the term should be changed to “risk assessment” for consistency with the newer federal rule; however, all “inspections/risk assessments” conducted by the Childhood Lead Poisoning Prevention Program are completed by NC-certified lead risk assessors who are in turn regulated by a separate state-administered program (10A NCAC 41C). Any inconsistencies between the programs are addressed internally as these two programs are co-located in the Environmental Health Section and supervised by the same program manager.

Commission for Public Health	15A NCAC 18A .3101	DEFINITIONS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	#(3) 'Safe work practices'- as written appear to be less stringent, in some regards omits and doesn't take into account or reflect the current 'Work Practices' that are defined and required under NCAC and EPA 40 CFR 745 Subpart E, Residential Property Renovation effective April 22, 2010 for renovation activities or EPA 40 CFR 745 Subpart L, Lead-Based Paint Activities effective August 29, 1996. Some reference to the work practices required in the federal references would be appropriate in addition to those currently listed.	The adoption of the definition of "safe work practices" in 15A NCAC 18A .3101 preceded by 15 years the definition adopted in 10A NCAC 41C. We recognize that some revision to the list of work practices may be needed for consistency with the newer federal rule; however, only contractors conducting remediation activities for compensation are regulated under 10A NCAC 41C. Property owners are allowed to do their own remediation under 15A NCAC 18A .3100, and the current definition of "safe work practices" establishes the standard of care for these no compensation compliance activities. Any inconsistencies between the programs are addressed internally as these two programs are co-located in the Environmental Health Section and supervised by the same program manager. tion to those currently listed.
Commission for Public Health	15A NCAC 18A .3101	DEFINITIONS	Public Coment as defined in G.S. 150B-21.3A(a)(5)	#(5) - 'Visual Inspection'- should specify 'NC' certified lead inspector or 'NC' certified lead risk assessor-if not certified by NC, these individuals would be non-compliant with existing NC rules. Again, this definition broadens the federal definition of a visual inspection by requiring the inclusion of paint, dust, or soil sampling as part of a visual inspection - these sampling activities are part of 'clearance testing', that follows a visual examination	Visual inspections for compliance of remediation can be performed by a local environmental specialist, who are not certified inspectors or risk assessors, if sampling is not involved. Under the Childhood Lead Poisoning Prevention Program, clearance inspections are defined as compliance visits for the elimination of lead poisoning hazards in accordance with a remediation plan, which includes a visual inspection followed by environmental sampling (by a certified individual) if the visual inspection is passed.
Commission for Public Health	15A NCAC 18A .3105	LEAD POISONING HAZARD AND CLEARANCE STANDARD FOR SOIL	Public Coment as defined in G.S. 150B-21.3A(a)(5)	Paragraphs (a)(2), (b)(1) and (b)(2) - Bare soil being a lead poisoning hazard at 2,000 ppm appears to be less stringent, as it exceeds the current EPA requirement of - equal to or exceeding the average of 1,200 ppm for other bare soil areas in the rest of the yard, is a defined soil lead hazard.	GS 130A-131.7. defines bare soil being a lead poisoning hazard as any concentration of lead in bare soil in play areas, gardens, pet sleeping areas, and areas within three feet of a residential housing unit or child-occupied facility equal to or greater than 400 parts per million. It is also defined as a concentration of lead in bare soil in other locations of the ya+F7rd equal to or greater than 1,200 parts per million. The General Statute was adopted more recently and supersedes this rule. The rule needs to be revised to reflect the current General Statute definition, which is equivalent to the current EPA standard.

Agency	Rule	Name	Type of Comment	Comment	Agency Response
Commission for Public Health	15A NCAC 18A .3107	MAINTENANCE STANDARD	Public Comment as defined in G.S. 150B-21.3A(a)(5)	(a) some reference to ensuring the use of 'NC certified renovation firms and renovators' where applicable (i.e., renovations that involve disturbance >6 SF for interior and >20 SF for exterior, done for compensation and where no LBP testing has been done to show no lead), as part of - to be clear the renovation rules apply to all Pre-1978 housing, not just pre-1950, when it comes to repair and painting and other renovation activities or abatement activities as defined by existing NC GS 130A-453.24 and 130A-453.04 respectively.	Rules governing NC certified renovation firms and renovators are administered under NC GS 130A-453.24 and 130A-453.04, not under the Childhood Lead Poisoning Prevention (15A NCAC 18A .3100) rules. Those requirements already apply to any remediation activities conducted in pre-1978 housing.
