9B. Explain: These changes are suggested to improve program efficiency, district delivery and water quality improvements made by this program. The revisions allow the Commission to specify in its annual Detailed Implementation Plan the proportion of available funds to allocate for cost share payments, technical and administrative assistance, and education and outreach purposes and the proportion of those funds to be allocated to district, statewide, and regional allocations pools. This is particularly important given the limited amount of recurring funding currently available in this program.

OFFICE OF ADMIN HEARINGS

Copy
9/13/16

Form 0400, Submission for Permanent Rule 15A NCAC 02D .0545

Block 9B.

Explain: On May 22, 2015, the U.S. Environmental Protection Agency (EPA) issued a final action to ensure states have plans in place that are fully consistent with the Clean Air Act and recent court decisions concerning startup, shutdown and malfunction (SSM) emission limit exemptions. EPA's final action responded to the Sierra Club Petition; clarified the EPA's SSM Policy to assure consistency with the Clean Air Act and recent court decisions; and finalized findings that the SSM provisions in the SIPs of 36 states including North Carolina do not meet the requirements of the Clean Air Act (CAA) and issued a "SIP call" for each of those states.

15A NCAC 02D .0545, Treatment of Malfunction Events and Work Practices for Startup and Shutdown Operations, is adopted and would be in effect in the event that states' lawsuits on the validity of the SIP call are unsuccessful as indicated in its introductory language. 02D .0545 eliminates the exemptions in paragraphs (c) & (g). For startup and shutdown, 02D .0545 allows a facility to demonstrate compliance with the applicable existing emission limits, generally available work practice standards, work practice standards in analogous federal rules that a specific source may not otherwise be subject to, or source specific startup and shutdown work practice standard permit limit. For malfunctions a facility may demonstrate compliance with the applicable existing limits or with a source specific malfunction work practice standard permit limit.
