9b. Explain Reason For Action.

The Board of Pharmacy amended this rule to expand health care facilities' discretion in employing their pharmacy technicians in several ways. These amendments are the culmination of a two-year process of a Board working group that included representatives of a wide variety of health care facility pharmacies, including hospitals, long-term care facilities, hospice and others.

The rule previously set out certain functions that can be performed in hospitals by "validating technicians," which is a defined term that the Board used to describe technicians that the Board determined had the knowledge to perform those specific tasks.

First, based on the recommendation of industry experts, the Board expanded the tasks that validating technicians may perform under the oversight of a health care facility pharmacist. The amendment increases the ability of those technicians to confirm that automated devices have functioned as intended in dispensing or preparing drugs, given that the technology has an extremely high accuracy rate, and that the drugs still must be reviewed by a pharmacist as safe and effective for the patient. The amendment further allows technicians to validate the preparation and packaging of large-batch, low-risk, non-patient-specific products.

Second, based on the recommendation of industry experts and a study of available training programs, the amendment increases the number of technicians who can serve as validating technicians. At the time of the initial rule, an associate's degree in pharmacy technology was the only available credential with adequate assurances that technicians could perform the tasks set out in the rule. However, the Pharmacy Technician Certification Board has since created certification programs for a variety of technician competencies and tasks. The Board and working group carefully considered the components of those programs and whether (and which of) those programs are adequate preparation for certain tasks. The amendment reflects that judgment. Furthermore, the Pharmacy Technician Certification Board programs are accessible to any technician, rather than only those technicians who have the ability to attend an associate's degree program. North Carolina already leads the country in the number of technicians holding these certifications, and the proposed amendment would recognize their qualifications to perform these tasks.

Third, the rule previously was limited to hospital pharmacies and technicians. The amendment expands to include all health care facilities that are addressed in the relevant section and defined in 21 NCAC 46 .1317. The original rule was limited, as it arose out of a pilot program involving three hospitals. With over fourteen years of experience under the rule, the working group and the Board concluded that there were no relevant differences among any of the types of health care facilities.

9B. Explain: <p>Rule 01I .2103 applies to local government employees who are subject to the State Human Resources Act. These are employees of local social services departments; county or district health departments; local emergency management agencies that receive federal grant-in-aid funds; and area mental health, developmental disabilities, and substance abuse authorities. The Office of State Human Resources included a provision on this subject in Section 7 of the OSRH agency bill, House Bill 223. The bill was signed by the Governor on June 28, 2024. An Administrative Code change is required to give local government employers the same trainee salary flexibility as state agencies.</p>
