9B. Explanation of Reason for Action

The Board adopted this rule to accommodate standardized orders in health care pharmacy settings (such as hospitals and long-term care facilities). Standardized orders are ones that allow a health care facility pharmacist-manager to establish criteria for ordering medications that are determined to be safe for all patients meeting those criteria, regardless of any drugs, supplements, or other substances that might have been consumed by those patients. Because of the absence of any relevant distinction among those patients, the medications would be able to be dispensed without patient-specific drug regimen review being performed. This rule was the product of study by a working group that included members from a wide variety of health care pharmacy settings.

9B. Explanation of Reason for Action

The Board adopted 21 NCAC 46 .1822 to permit a pharmacy to deliver prescriptions that have been fully filled and labeled for specific patients by having certain pharmacy personnel deliver them at a fixed alternate delivery site. This rule change was originally proposed by a pharmacist as a method of facilitating service to remote locations that cannot support a pharmacy. This method has recently been used successfully in Virginia with no adverse impact to the public health, safety, and welfare. The requirements of the rule largely track the requirements for direct-to-patient locker and kiosk systems (21 NCAC 46 .1821), which the Board adopted in 2023. As a result of notice and comment, the Board increased the time that the pharmacy has to retrieve undelivered drugs from the alternate delivery site, to more closely align to common insurance requirements for returning drugs to stock.

There are conforming changes to (a) the limited service permit rule (21 NCAC 46 .1616) to provide for permitting and inspection of the alternate delivery site; (b) the direct-to-patient delivery system rule (21 NCAC 46 .1821) to acknowledge the new rule; and (c) the pharmacy emergency closure rule (21 NCAC 46 .2516) to provide for delivery of filled prescriptions to a pharmacy's nearby alternate delivery site if the pharmacy is subject to emergency closure, so that patients can have the choice to retrieve drugs during that closure.
