| Commission for Public  | 10A  | Health| Public Comment  | I believe you need to clarify whether to include other locations where meth is being manufactured, for example, vehicles, areas accessed by the public (store) and outdoor camp grounds, that are subject to decontamination. | This is already covered by the authorizing statute. 
§ 130A-284. Decontamination of property used for the manufacture of methamphetamine. For the protection of the public health, the Commission shall adopt rules establishing decontamination standards to ensure that certain property is reasonably safe for habitation. An owner, lessee, operator or other person in control of a residence or place of business or any structure appurtenant to a residence or place of business, and who has knowledge that the property has been used for the manufacture of methamphetamine, shall comply with these rules. For purposes of this section, the terms "residence" and "place of business" shall be defined as set forth in G.S. 130A-334. (2004-178, s. 7.) |
