The past presence of SAV may be demonstrated by aerial photography, SAV survey, map, or other documentation. An extension of the past 10 annual growing seasons criteria may be considered when average environmental conditions are altered by drought, rainfall, or storm force winds.

This habitat occurs in both subtidal and intertidal zones and may occur in isolated patches or cover extensive areas. In defining SAV habitat, the Marine Fisheries Commission recognizes the Aquatic Weed Control Act of 1991 (G.S. 113A-220 et. seq.) and does not intend the submerged aquatic vegetation definition, or of this Rule or 15A NCAC 03K .0304 and .0404, to apply to or conflict with the non-development control activities authorized by that Act.

11	(17)	"Prohibited" means shellfish growing waters unsuitable for the harvesting of shellfish for direct
12		market purposes.
13	(18)	"Public health emergency" means any condition that may immediately cause shellfish waters to be
14		unsafe for the harvest of shellfish for human consumption.
15	(19)	"Restricted" means shellfish growing waters from which shellfish may be harvested only by permit
16		and are subjected to a treatment process through relaying or depuration that renders the shellfish
17		safe for human consumption.
18	(20)	"Sanitary survey" means the written evaluation of factors that affect the sanitary quality of a shellfish
19		growing area including sources of pollution, the effects of wind, tides, and currents in the
20		distribution and dilution of polluting materials, and the bacteriological quality of water.
21	(21)	"Shellfish" means the term as defined in G.S. 113-129, except the term shall not include scallops
22		when the final product is the shucked adductor muscle only.
23	(22)	"Shellfish growing area" means a management unit that defines the boundaries of a sanitary survey
24		and that is used to track the location where shellfish are harvested.
25	(23)	"Shellfish growing waters" means marine or estuarine waters that support or could support shellfish
26		life.
27	(24)	"Shellstock" means live molluscan shellfish in the shell.
28	(25)	"Shoreline survey" means an in-field inspection by the Division to identify and evaluate any
29		potential or actual pollution sources or other environmental factors that may impact the sanitary
30		quality of a shellfish growing area.
31	(26)	"Systematic random sampling strategy" means a sampling strategy designed to assess the
32		bacteriological water quality of shellfish growing waters impacted by non-point sources of pollution
33		and scheduled sufficiently far in advance to support random collection with respect to environmental
34		conditions.
