**Explain:** Session Law 2023-137, Section 6, requires that any person who recreationally harvests red drum, flounder, spotted seatrout (speckled trout), striped bass and weakfish (gray trout) from coastal fishing waters, joint fishing waters, and inland fishing waters adjacent to coastal or joint fishing waters report that harvest to the N.C. Division of Marine Fisheries. The law directs the Marine Fisheries Commission and the Wildlife Resources Commission to adopt temporary rules to implement the requirements. The temporary rules will remain in effect until the permanent rules that replace them become effective.

NOTE: On February 27, 2024, the WRC submitted a request to the RRC to waive the 210-day requirement for temporary rulemaking after the enactment of legislation. The RRC approved the waiver at their February 28, 2024 meeting and provided an additional 60 days for adoption of temporary rules, moving the deadline from May 7, 2024 until July 6, 2024.

**7. Why is adherence to notice and hearing requirements contrary to the public interest and the immediate adoption of the rule is required?**

Beginning December 1, 2024, recreational anglers will be required to report their harvest of red drum, flounder, spotted seatrout (speckled trout), striped bass and weakfish (gray trout). S.L. 2023-137 created harvest reporting requirements for the MFC and WRC to implement, first via temporary rule and then via permanent rule. Temporary rules have been adopted by the MFC and WRC as required. Permanent rules to replace the temporary rules will be adopted as required once the agencies can take the information gained from the initial phase of implementation to refine the requirements for the permanent rules as needed.
